We Have Greatly Added To OPEN STOCK DINNERWARE

While many sets cannot be complete until after the war, we have recently completed a number of popular patterns in American and English Porcelain, Haviland, and Limoges China. Where we have not been able to duplicate patterns in many cases we have bought patterns that are similar, that will be suitable to use together.

Some of the patterns are entirely new, others are the popular patterns in dainty designs or trimmed in gold, our stock of white and gold Haviland china being especially good. As prices are steadily advancing, we would advise early selection, for even where stocks can be reordered the price will be much more.

"PYREX"

Is Ideal For Cooking and Serving

The transparency of Pyrex enables the cook to see the process of cooking right through it. Of graceful design, it is made for the table no less than for the oven. Since one dish takes the place of two, pantry space, utensils and drudgery of dishwashing are saved. These salient points plus the fact that it can be used for serving upon the table as well as for cooking the food, make it a constant appeal to the woman who takes pride in her kitchen ware and the products she turns out with them.

Our line includes all the popular pieces in the most wanted sizes. Moderately priced.
